## IMAGINE SOFTWARE WINS TOP INDUSTRY AWARDS IN 2007

*Strong Global Product Acceptance Supports Awards*

NEW YORK, December 10, 2007—Imagine Software, the leading provider of on-demand trading, portfolio, and risk management solutions worldwide, announced today it was voted the #1 equity trading system for the third straight year in **Risk Magazine's** annual technology awards. The firm also placed #2 in equity analytics.

This award adds to the many others Imagine won in 2007, including: "Best Buy-side Risk Analytics Product," **Buy-Side Technology Magazine**; #1 Equity Trading System, **Asia Risk Magazine**; and #1 Risk Software functionality and #2 Overall Risk Management, **Alpha Magazine**.

Steven Harrison, Imagine's President and COO, commented: "All of us at Imagine Software are very happy and honored by the industry recognition Imagine has received from these prestigious publications. These awards are particularly meaningful to us as a software vendor because despite differences in the way winners are chosen—end-user voting versus selection by editorial staff and research consulting firms—and stiff competition, Imagine consistently ranks at the top of award categories most relevant to our sell-side and buy-side clientele. Our company never rests on its laurels, however. These awards will spur us on to even greater achievement in 2008."
