IMAGINE SOFTWARE ADDS INDUS CAPITAL PARTNERS TO ITS GROWING LIST OF HEDGE FUND CLIENTS

Leader in Asian Markets Selects Leader in Risk Management

Imagine Software, the leading provider of on-demand trading, portfolio, and risk management solutions for the global financial industry, announced today that Indus Capital Partners has selected the Derivatives.com platform to assist in managing its trading activity.

Indus Capital Partners is a multi-strategy hedge fund manager specializing in Asian securities. It has experienced steady growth over the past five years, mirroring the increased interest in the Asian markets as an investment alternative. Indus will utilize Imagine's platform for real-time analytics and robust risk management.

"Imagine provides us with a robust suite of leading edge analytics designed to help us make even more informed trading decisions," said Jim Gallagher, Managing Director at Indus Capital Partners. "Because we work with multiple prime brokers, we also benefit greatly from using Imagine's single platform risk management system."

"We are pleased that Indus Capital Partners has made Imagine its technology partner of choice for trading analytics and risk management", added Steven Harrison, President of Imagine Software. "Many of our clients with multiple prime brokers benefit from Derivatives.com's ability to seamlessly aggregate positions from multiple sources. In addition, as the financial markets become increasingly competitive, managers are employing more and more complex and volatile strategies. Derivatives.com has become a requirement to help firms optimize returns and manage risks within this increasingly complex environment."

Imagine Software's risk management product is available as an in-house, enterprise system called The Imagine Trading System, or through an ASP platform known as Derivatives.com. Both systems allow users to manage P&L and risk across all strategies, across most asset classes and to share information across a firm. Imagine has become the leading risk management platform for hedge funds and the buy-side community and currently has over 100 firms worldwide on the Derivatives.com platform. It was named Risk Magazine's Top Equity Trading System in 2005 and Top Equity Analytics System in both 2004 and 2005.
